Summary

Dedicated IT Professional with 3+ years of experience specializing in network infrastructure and technical support. Expert at managing distributed systems and troubleshooting complex connectivity issues across Linux and Windows environments. Proven track record in resolving critical system failures and advocating for user-centric solutions to maintain high performance and infrastructure stability.

Work Experience

Team Leader & Backend Developer

January 2026 – August 2026

GYM OPTIMIZED LLC, REMOTE

- Managed a four-person distributed team using Jira to coordinate Agile/Scrum sprints for a cross-platform production application.
- Architected secure cloud infrastructure with Azure SQL and REST APIs, implementing robust network security via parameterized queries.
- Troubleshoot and resolved critical infrastructure failures during beta testing, ensuring full data-persistence restoration for all active users.
- Partnered with project sponsors to resolve technical defects and advocate for system improvements across four high-velocity testing cycles.

Team Leader

January 2024 – January 2024

BEYOND THE SHACKLE INITIATIVE, CAMEROON

- Acted as the primary technical resource for students, providing empathetic troubleshooting support during educational workshops.
- Resolved administrative friction points by streamlining documentation processes, reducing reporting errors by 20% through infrastructure optimization.
- Advocate for student success by mentoring participants and managing resource allocation to increase program participation by 30%.
- Managed cross-functional communications using Slack and documentation tools to coordinate high-volume program activities.

Education

Bachelor of Applied Science in IT System Administration,

Present

GPA: 3.98/4.00, 68 credits completed, 7 embedded certificates, BYU-Pathway Worldwide program

ENSIGN COLLEGE

Associate in Applied Science in Information Technology, GPA: 3.98

August 2026

ENSIGN COLLEGE

Additional Skills

Networking & Security: Networking, DNS, IP Addressing, IP Subnetting, Firewalls, Routing, VLANs, Network Security, VPN, DHCP, ACLs, OSPF, EIGRP

Operating Systems & Cloud: Linux, Ubuntu, CentOS, Windows, Windows Server 2022, MacOS, Microsoft Azure, AWS, Distributed Systems, Infrastructure, Proxmox VE

Support & Development: Technical Support, Troubleshooting, Jira, Slack, Git/GitHub, CI/CD Pipelines, Agile/Scrum, Python, PowerShell, Bash Scripting

Certifications

- Cisco Network Technician Career Path - Cisco Networking Academy (October 2025)
- DevOps Professional - PagerDuty & LinkedIn (April 2025)
- Technical Support Engineer - Ensign College (October 2025)

Projects

MedLynk Africa

Designing a bilingual healthcare technology platform connecting patients to pharmacies, clinics, and hospitals in Cameroon.

C2 Infrastructure Demo (Educational Cybersecurity)

Built a command-and-control demonstration in Python on Kali Linux using TCP sockets and multi-threaded architecture. Published code and documentation on GitHub.

Technologies: Python, Kali Linux

Cross-Platform Linux Server Administration

Deployed Ubuntu and CentOS servers on Oracle VirtualBox and Microsoft Azure for development and testing. Configured SSH key-based remote access, file-permission hardening, iptables/UFW firewall rules, and LAMP stack.

Technologies: Ubuntu, CentOS, Oracle VirtualBox, Microsoft Azure, SSH, iptables, UFW, LAMP stack, Bash, cron

Proxmox-Based Windows Server Virtualization Lab

Deployed Windows Server 2022 on Proxmox VE as a Type-1 hypervisor for domain controller and file server virtualization. Configured AD DS, DNS, DHCP, Group Policy, and OU structures.

Technologies: Proxmox VE, Windows Server 2022, Active Directory, DNS, DHCP, Group Policy

AWS DevOps Pipeline Environment

Configured Jenkins CI/CD pipelines on AWS EC2, integrated with Maven for build automation and Tomcat for deployment. Deployed SonarQube and New Relic.

Technologies: Jenkins, AWS EC2, Maven, Tomcat, SonarQube, New Relic, GitHub

Cisco Networking Simulation Lab

Built enterprise network topologies in Cisco Packet Tracer including VLAN segmentation, inter-VLAN routing, and ACLs. Configured static and dynamic routing (OSPF, EIGRP).

Technologies: Cisco Packet Tracer, VLAN, OSPF, EIGRP

Selected Training & Coursework

- Windows Server 2022: Active Directory (LinkedIn Learning)
- PowerShell 7 Essential Training
- CompTIA Linux+ Cert Prep
- AWS Cloud Essentials
- Python Scripting & Automation
- Subnetting & IP Addressing
- Introduction to Prompt Engineering
- Technical Writing
- Business Writing Principles
- DevOps Foundations: CI/CD, Infrastructure as Code
- Jira board, Agile project management

In Progress

- CompTIA Security+ (SY0-701) — Exam target December 2026
